

PRESS RELEASE
French National Academy of Medicine
March 03, 2022

In support of ukrainian doctors

Faced with a war imposed by a foreign power and condemned by the entire scientific community, the French National Academy of Medicine assures Ukrainian doctors of its committed support. It deplors the critical conditions in which our colleagues are forced to provide care to the wounded, the homeless and the displaced. It salutes their courage.

The French National Academy of Medicine will do everything in its power to assist Ukrainian doctors and care givers in their missions. The Academy remains attentive to the position of doctors and scientists of the Russian Federation.
